

# CONNELINK 3C overview

The 3C collaborative suite (CONNELINK Collaboration Cloud) is the result of a collaboration between 3 major players:

- **AWS or OVHcloud, leader in Cloud hosting** that provide the infrastructure
- **HCL Software, global software publisher**, which develops the main software bricks (3,800 developers around the world)
- **CONNELINK, French software services company specializing in collaboration** since 2013, which assembles the solution to provide a unique SaaS service

3C offers professional solutions for communication, collaboration, security and application development.
